

## Instructions for Programmable Wired Controller

(model: R8C.963)

### How to set it:

#### On & Off:

To turn the controller on or off, press and hold the home/power button for a three seconds.

- When the controller is off, it shows 'OFF' in the top right corner of the screen
- When the controller is on, the wifi symbol will be in the top right corner of the screen

#### Set up the current time and day:

- Press 'enter' to go into the menu, and then use the dial to scroll through the menu to 'System Settings'. Press 'enter' again to open this.
- Use the dial to scroll down to 'Date/Time Settings' and press 'enter' to select this option. Select either date or time and use the dial to select the correct date and time. Once they are correct use the 'back' button to save the settings and return to the home screen.

**Note:** Connecting to wifi will ensure the date/time will save even if there is a power outage. Otherwise, the date and time will have to be reset every time the controller loses power.

#### Connect to wifi:

- Press 'enter' to go into the menu. Select 'Wifi Settings'. Switch the wifi on and choose your network. Enter the password by using the dial.

#### Set up the temperature program:

- Press 'enter' to go into the menu, and then use the dial to scroll through the menu to 'Auto Mode'. Press 'enter' again to open this.
- Select 'Weekly Programming'. Here you can select either weekday or weekend mode and then within these options adjust the times and temperatures within your schedule by pressing 'enter' to select each time and then use the dial to change both the time and temperature. Pressing 'back' will save your selections and return you to the previous page.

**Note:** If you have connected the app, you will be able to control these settings from your phone.

#### Connect to the app:

- Press 'enter' to go into the menu, select 'Cloud Service'.
- To download the app, select 'APP Download' and then scan the QR code.
- Once the app is downloaded and you have set up an account, select 'Binding Device' within the 'Cloud Service' menu and scan this QR code using the app.
